## **Background**

The 2017 Kids' Life and Times (KLT) survey is the tenth to be carried out by ARK. ARK is a joint resource between Queen's University Belfast and Ulster University. Its goal is to make social and political information on Northern Ireland available to the widest possible audience.

ARK had run two annual attitudes surveys for a number of years: the Northern Ireland Life and Times survey for adults aged 18 years and over (1998 to date) and the Young Life and Times (YLT) survey for 16 year olds (2003 to date). However, despite a growing interest in the area of children's rights and needs, the opinions of younger age groups were mostly ignored when decisions were being made about many issues involving them. Conscious of this, ARK recognised the need for a regular and rigorous children's survey that would provide easily accessible, quality research data for the academic, voluntary and government sectors, and promote the participation of children and young people in decisions that affect their lives.

Given this context, in 2007 ARK investigated the feasibility of running a survey of children in Northern Ireland and consulted with school principals, parents and children. Several survey methodologies were considered. However, in order to maximise coverage and response, an online survey based in schools was seen as the most appropriate; all primary schools in Northern Ireland have internet access as part of the Classroom 2000 (C2k) initiative (<http://www.c2kni.org.uk/>). The first KLT survey took place in 2008.

The 2017 KLT survey builds on the success of the previous KLT surveys and uses the same methodology to assess the views of P7 children in Northern Ireland. The fieldwork for the 2017 survey was carried out from 6 November 2017 to 9 February 2018.

## **Acknowledgements**

The KLT team would like to acknowledge the help, advice and support given by the following individuals and organisations:

- The Department of Education and the Education Authority for providing contact details and/or sending out information on our behalf.
- C2kNI and CCMS for emailing reminders to primary schools.
- Bang on the door for allowing us to use their characters.
- Our Funders for 2017: Department of Education (DE); Improving Children's Lives, Queen's University Belfast.

We particularly appreciate the time and effort taken by everyone involved in each school and the P7 pupils who participated in the survey.

## **Technical details of the 2017 survey**

### **Ethical permission**

Ethical permission was sought, and obtained, from the Ethics Committee based in the School of Social Sciences, Education and Social Work, Queen's University Belfast.

### **Target population**

The target population was all P7-age children in Northern Ireland. There were approximately 24208 in total which included P7-age pupils attending 854 primary schools (this included P7-age children in hospital, special and independent schools), and children in this age group who were being taught at home.

Within Northern Ireland, the overall administration of the education system is carried out by the Department of Education (DE), and the Education Authority (EA) which provides education, library and youth work services. The data required to access the target population was provided by them and, as such, the KLT team were able to target as many P7-age children throughout Northern Ireland as possible.

DE provided two databases in June 2017. One contained the names and addresses of all primary schools in Northern Ireland and the number of P6 pupils in each - as the questionnaire would be completed between November 2016 and January 2017, these P6 pupils would by then be in P7; the second database contained the names of the principals of each school. The databases were merged by the KLT team.

A small number of children living in Northern Ireland are educated at home, and registration of this group is undertaken by the EA who facilitated access to this group of children.

### **Communication with schools**

On 13 October 2017 all principals of primary, special and hospital schools in Northern Ireland received a letter providing information on the survey and advising that the fieldwork would begin on 6 November 2017 and run until 26 January 2018; a child-friendly comic with key findings from previous surveys was also included. A contact telephone and an email address were provided so that principals could contact the survey team for more information. The letter also offered schools an anonymised, confidential summary report based on their school's responses.

On 23 October 2017, principals were sent a second letter from the survey team, along with an instruction document for teachers, a copy of the parental consent form and a KLT bookmark for every P7 pupil in the school. Principals could contact the KLT helpline to request translations of the consent forms and requests were received for Lithuanian and Polish versions. The letter also directed principals and teachers to the KLT website where they could access the results of previous surveys and, importantly, view the content of the 2017 questionnaire. Each letter included a unique three-digit identification code for that school allocated by the KLT team for administrative purposes. A trouble-shooting document was also made available on the KLT website.

On 6 November 2017 the relevant documentation relating to the survey and postage paid envelopes were sent to the contact in the EA who posted the documentation on our behalf to the parents/guardians of each child who was on elective home education inviting them to take part in

the survey. Also on 2 November 2017, C2kNI emailed all primary schools reminding them that the survey would be available for completion from 6 November 2017. In addition, CCMS contacted schools on our behalf. A reminder email was sent by C2kNI on 11 December 2017.

Follow-up telephone calls were made in January to schools that had not participated in KLT and, as in previous years, this helped to boost the response rate.

### **Consent**

Consent to participate involved three levels:

- Firstly, the school principal agreed that the school could participate.
- Secondly, a parent or guardian of each P7 pupil within the participating schools received a consent form which they were asked to complete and return to the school if they **did not** wish their child to take part.
- Thirdly, at the start of the questionnaire, each child was asked if s/he agreed to take part.

### **Online questionnaire**

The online questionnaire was designed and administered by the ARK team. The survey began with an animated, audio introduction voiced by Professor Gillian Robinson, Director of ARK. Since 2008, ARK has had permission to use characters from 'Bang on the Door' to make the survey fun and interesting to complete. The questions were presented in different ways to try to maintain interest, for example, clicking on words or writing into a text box. Before the survey went live, testing was done by members of the KLT team to ensure that all links/questions were working correctly.

Throughout the design of the questionnaire, the KLT team worked closely with C2kNI which is the organisation responsible for the provision of an ICT-managed service to all schools in Northern Ireland.

### **Completing the questionnaire**

As noted above, schools were advised that the fieldwork period would run from 6 November 2017 to 26 January 2018 and most completed within this period. However, some schools requested an extension and the survey remained open until 9 February 2018.

Once the child agreed that s/he wanted to take part, s/he was asked to enter the three-digit school identification number. This number was printed on all documentation sent to the school by the KLT team. However, the child was also able to enter the seven-digit school code used by DE. When the code was entered, the full name and address of the school appeared on the screen, and the child was asked to confirm if this was the correct school. The class teacher or other staff member was able to phone the KLT helpline at any stage to confirm their identification number. No further identification codes or names of children were required.

### **Survey content**

The questionnaire took about 20 minutes to complete. Each question had a 'Skip' option which the children could use if they did not want to answer it. The questionnaire was designed by the KLT team in association with funding organisations and children.

Questions on KLT 2017 included:

- Home and family;
- Bullying in school;
- Shared Education;
- Community Relations, Equality and Diversity(CRED) Education;
- Healthy lifestyles.

In addition, the 10-item KIDSCREEN instrument, a health-related quality of life questionnaire for children and young people, and one domain (Social self-peers) from the Coopersmith Self-Esteem Inventory, were included. At the end of the survey, respondents were given the opportunity to suggest questions they felt should be included in any future KLT surveys.

### Response rate

Fairly accurate information on the number of pupils in primary, special and hospital schools is available from the database provided by DE. However, in order to maintain anonymity, KLT did not have exact figures on the number of children being taught at home or within special units for those children who were not in school. Therefore, the response rates quoted here can only be approximations.

There were 854 schools with P7-age pupils on the database provided by DE, and of these 180 participated in the survey, representing 21 percent of schools.

There were 24208 P7-age children. This figure was compiled using the numbers of P6-age pupils from the DE database (June 2016) who at the time of the survey would be in P7 and also included children who were on elective home education. In total 4505 logged on to the survey, a response rate of approximately 19 percent.

Table 1 presents the response rate within the Council areas for schools and for children. The highest response rate for schools came from the Newry, Mourne and Down area (15%), with the lowest being Antrim and Newtownabbey (4%). Table 2 shows the response rate by school and by children, for each school management type.

**Table 1: Response by Council**

	Schools %	Children %
Antrim and Newtownabbey	4	6
Ards and North Down	8	9
Armagh City, Banbridge and Craigavon	13	11
Belfast	11	19
Causeway Coast and Glens	10	8
Derry City and Strabane	7	6
Fermanagh and Omagh	10	7
Lisburn and Castlereagh	6	7
Mid and East Antrim	6	6
Mid-Ulster	11	9
Newry, Mourne and Down	15	12

**Table 2: Response by type of school management**

	Schools %	Children %
Controlled	41	45
Catholic Maintained	51	48
Controlled Integrated	3	4
Grant Maintained Integrated	2	2
Voluntary	2	1
Other Maintained	1	<1
Special and Elective Home Education	1	<1

Table 3 compares the data distribution of all schools by the school location with the distribution of schools participating in KLT.

**Table 3: Response by school location**

	DE school figures %	KLT %
Urban	45	49
Rural	55	51

Table 5 compares the gender of KLT respondents with the overall figures across P7 pupils in Northern Ireland.

**Table 4: Response by gender**

	DE figures %	KLT %
Boys	51	49
Girls	49	51

### **Accessing the data**

Tables of results from the 2017 survey are available on the KLT website. Users can also download the data in SPSS portable file format from the website to carry out their own statistical analyses. However, all identifying information, and open-ended variables have been removed from this dataset. The KLT website is available at [www.ark.ac.uk/klt](http://www.ark.ac.uk/klt)

### **Using the data**

This document is intended to provide background information on the survey and the survey methodology; if you require any further technical information please contact us (see details below).

The data have been tested extensively, but if you find anything that looks like an error please let us know as soon as you can.

A helpline service is available for anyone who has a query about the survey or the results (see contact details below). Alternatively, you can use the help section on the KLT website ([www.ark.ac.uk/klt/help/](http://www.ark.ac.uk/klt/help/)).

**Contact information**

For all queries relating to the survey please contact:
